

Annabella Nguyen

Atlanta, GA | ngu.annabella@gmail.com | <https://www.linkedin.com/in/annabella-nguyen/>

Education

Georgia Institute of Technology Atlanta, GA Master of Science in Analytics	Jan. 2026 – Present
University of Georgia Athens, GA Bachelor of Science in Biological Engineering	June 2022 – May 2025

Experience

Pricing Analyst Intern Blue Bird Corporation <i>Macon, GA</i>	May 2026 – July 2026
- Analyzed 5.5M+ part sales transactions using Python to identify pricing opportunities and evaluate dual-channel pricing performance - Developed regression, price elasticity, and scenario analysis models to support pricing recommendations and estimate revenue and margin impacts - Performed data cleaning, feature engineering, and exploratory data analysis by integrating multi-year sales, pricing, warranty, and VIO datasets - Built interactive Power BI dashboards and automated Python workflows to communicate insights and support users	
Data Analyst Intern Excelerate <i>Remote</i>	June 2025 – July 2025
- Developed Power BI dashboards and Excel reports to track click-through and conversion trends by demographic and region; enabled marketing team to optimize budget allocation - Validated and interpreted marketing datasets in Excel, identifying patterns in campaign performance and ensuring accurate reporting for weekly team reviews - Collaborated with a multi-national team, presenting findings and recommendations to improve cross-functional communication and strategic decision-making - Learned to transform complex datasets to clear, actionable insights, strengthening analytical and presentation skills	

Project Experience

Machine Learning & Predictive Analytics Projects GaTech Analytics Master Student	Jan. 2025 – Present
- Applied supervised and unsupervised learning techniques including advanced regression models, LASSO, Elastic Net, k-means clustering, hierarchical clustering, survival analysis, and time-series forecasting to real-world datasets - Performed data preprocessing, exploratory data analysis, feature engineering, model evaluation, and statistical analysis using Python and R - Communicated findings through technical reports and data visualizations to support decision-making	
Epidemiology Research Project Data Analyst	May 2025 – June 2025
- Applied Excel and R to analyze CDC BRFSS 2022 healthcare dataset and identify trends in public health metrics across Georgia; presented findings to peers and supervising professor - Created dashboards and visual summaries of descriptive statistics, improving clarity of complex data for team review and discussion - Collaborated with teammates to document analytical workflow, enhancing process standardization and reproducibility	

Skills

Technical: Data analytics, Machine learning, Data visualizations, Statistical methods, Predictive models, Deep Learning

Programming: R, SQL, Python, MATLAB, JavaScript, CSS, HTML

Software: RStudio, JMP, Power BI, VS Code, Excel, AutoCAD, Inventor, SolidWorks, Revit, Rhino 3D, OpenRefine, Flask
